

System #6090EMI groups a variety of Legacy's high quality sealing system to ensure a full blockage of both electromagnetic and radio frequency interference. This system is generally used in government openings, EMI rooms in hospitals, high-security openings, and other similar applications. The aluminum products within this system have an iridate coating which makes certain of electrical conductivity. In addition, the extruded rubber has a specific component also ensuring that the rubber too is electrically conductive. Legacy is happy to work with manufacturers that are interested in implementing this system into their portfolio of offerings.

PRODUCT NOTES:

Tested as an assembly
 Finishes and options vary based on individual parts. Please see product cut sheets for more information

#5077-EMI 	Head & Jamb
#B182 	Head & Jamb Bottom
#1059 	Cam Lift Hinge
#7563-EMI 	Door Bottom
#3465-EMI 	Grounded Bronze Threshold

PRODUCT KEY

CA - Clear Anodized | MA - Mill Aluminum | BK - Black Anodized | DB - Dark Bronze Anodized | GD - Gold Anodized Aluminum | MB - Matte Black Powder Coat | WP - White Powder Coat | BR - Architectural Bronze | ORB - Oil Rubbed Bronze | POL - Polished Bronze | SP - Gray Steel Prime | SS - Stainless Steel | N - Closed Cell Neoprene | PSA - Pressure Sensitive Adhesive
EMI - Electromagnetic Interference
