

MAINTENANCE AND CLEANING

Automatic Door Bottoms, Door Sweeps, Saddles/Thresholds, Architectural Door Seals, Gasketing, Continuous Hinges

Legacy products do not require any routine maintenance. It is recommended that the fit of the gasketing be checked annually and adjusted if necessary to seal properly against the surface of the door. This should only be necessary if settling of the building occurs changing the fit of the door and frame.

If cleaning of any of our products is desired, Legacy recommends either dry dusting or wiping with a mild cleaning solution.

"Pull-out" Style ADB can be cleaned by removing the gut mechanism of the door bottom and wiping with mild cleaning solution.
